

The Occupational Health Clinic Network (OHCN) of New York State

Since 1987, the New York State Occupational Health Clinic Network has assisted New Yorkers by helping them to return to work safely and by preventing disease and injuries. OEMLI is the New York State Department of Health's designated center of excellence on Long Island for the prevention, diagnosis and treatment of occupational and environmental diseases. With more than 25 years of experience in caring for the workers of New York State, the OHCN is the nation's only state-based program of its kind. The clinics are available to all workers, retirees and residents in New York State. The OHCN clinics can bill directly to most major health insurance carriers, and no worker will be turned away because of an inability to pay.

Improving the Health of Long Island's Workers

Occupational and Environmental Medicine of Long Island (OEMLI) is the New York State Department of Health's designated center of excellence on Long Island for the prevention, diagnosis and treatment of occupational and environmental diseases. Part of North Shore-LIJ Health System's Department of Occupational Medicine, Epidemiology and Prevention, our doctors are nationally recognized in the field of occupational medicine with decades of combined experience. OEMLI's medical specialists possess a profound understanding of the health needs and risk factors facing the workers of Long Island and provide comprehensive medical care tailored to the specific needs of our patients and clients.

Workplace Wellness and Prevention

OEMLI provides services to employers and employees seeking to improve health outcomes. These services include:

- Ergonomic assessments
- Hearing conservation and noise exposure assessments
- Immunizations including seasonal influenza vaccinations
- Workplace assessments for potential injuries, exposures and environmental hazards
- Health screenings

Leading the Way in Occupational Health and Environmental Medicine

Occupational health is a field of study that focuses on identifying and controlling the risks arising from physical, chemical and other workplace hazards with the goal of establishing and maintaining a safe and healthy working environment. Environmental medicine is the study of the interaction between environmental workplace hazards and human health and illness. OEMLI's clinical team can serve as a consultative resource for clinicians and patients who have concerns regarding a range of exposure-related illnesses.

OEMLI's medical professionals routinely diagnose and treat individuals with environmental or work-related conditions stemming from:

- Musculoskeletal injuries
- Repetitive stress injuries (i.e., carpal tunnel syndrome)
- Lower back strains and injuries
- Asbestos
- Mold
- Silica and other inorganic dusts
- Solvents and chemicals
- Heavy metals

Services Offered to Long Island Workers and Employers

- Diagnosis and treatment of work-related medical conditions
- Social Security Disability assessments
- Prevention and treatment of repetitive stress injuries
- Independent Medical Examinations (IMEs)
- CDL and DOT medical examinations
- Drug and alcohol testing
- Assistance in filing paperwork related to Workers' Compensation claims
- Implementation and evaluation of OSHA, PESH, EPA and state-mandated medical monitoring programs
- Pre-employment physicals
- Return to work and fitness-for-duty evaluations
- Respirator medical clearances and fit testing

We accept all insurances including Workers' Compensation, No Fault and Medicare/Medicaid.

We offer assistance in applying for medical coverage plans, as well as options for people who are uninsured.
