

SBO Ballot
Departmentalization of ELA and Math in 3rd Grade
(District/School)
(School Year)

Contract Article 7:

Teachers should be given an opportunity to fill out "preference sheets" indicating three preferences in order of priority of grade level and type of class on that level or, in the case of special education teachers, the age range of special education classes and education program designation (e.g. staffing ratio, collaborative team teaching, SETSS, etc.) with the understanding that, where advisable and possible, such preferences will be honored. Teachers should be given an opportunity to discuss their assignment requests with their principal.

SBO:

This SBO would allow for departmentalization of ELA and Math in 3rd grade, meaning the teacher who is selected through (choose: a posting or preference sheets) will be responsible for teaching ELA or Math (add any other subjects agreed upon) to the entire 3rd (could be grades 1-3 or additional subjects in grades 4-5) grade. The number of teaching, lunch, and prep periods will remain the same as a regular (choose: classroom or cluster) teacher.

I want (school) to modify the contract as stated above.

Yes _____ No _____
